

DELORME

MapLibrary

ANNUAL SUBSCRIPTION

Map Library Subscription Card

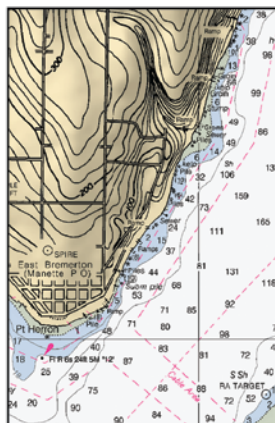

Provides users of both Earthmate PN-Series GPS receivers and Topo USA software with a full year's worth of unlimited access to the online DeLorme Map Library, for easy downloads of the following:

USGS 7.5-Minute Topographic Quad Maps

High-Resolution Color Aerial Imagery

NOAA Nautical Charts

Coverage:

USGS 7.5-min. Quads – seamless, digitized versions of the authentic 1:24000 scale topographic maps; available for the entire U.S.

Color Aerial Imagery

DOQQ* – Entire continental U.S. except as follows: majority coverage for MN, NM, NV, and NY

USGS High-Resolution City – 133 U.S. cities and surrounding areas

NOAA Nautical Charts – U.S. Atlantic, Pacific and Gulf coasts; Great Lakes; major inland harbors (e.g., Seattle, Philadelphia), lakes (e.g. Mead, Champlain), and sections of rivers (e.g., Mississippi, Columbia, Hudson, Delaware)

Also available for the continental U.S.: USGS black and white DOQQ and 10-meter color satellite

*Digital orthophoto quarter-quadrangle

Once downloaded, the selected maps, imagery or charts will henceforth be automatically available for viewing and use on the PC. They can also be sent to the PN-Series device or SD card via fast and easy USB transfer.

The ability to display the kind of supplemental data available in the DeLorme Map Library is one of the key differentiators for the Earthmate PN-Series GPS receivers.

Why spend hundreds of dollars on a GPS, and then be limited to just one source for maps?

Our Map Library subscription provides users with unrivaled choices for supplemental maps and imagery. Each adds value by showing specific types of detail, including:

USGS Quads – buildings, towers, landmarks, excavations, springs, and more

Color Aerial Imagery – a true bird's eye view of any location, including buildings, tree lines, agricultural lands, and more

NOAA Nautical Charts – depth soundings, restricted areas, navigation aids, hazards, and more

Each of these Map Library options can be viewed on the PC in full-screen, or in split-screen side by side with Topo USA. The Topo USA draw tools enable users to mark or trace features from the quads, imagery or charts directly onto Topo USA with precise positional accuracy. With all these options, Map Library subscribers have a unique ability to prepare for any kind of outdoor activity on the PC, and navigate worry-free with their PN-Series GPS.

Terms:

The subscription card requires no in-store activation. It entitles the user to unlimited online downloads during the one-year subscription period. Downloaded maps, charts, and imagery are the user's to keep.
